

AI-Powered Groundwater Planner

Saving Lahore's Water — one drop at a time.

The Problem

20 Years Ago

Water was only **31 feet** deep underground.

Today

Water is now **79 feet** deep — and going down fast.

By 2040

If nothing changes, **no water left** for Lahore.

Where I Got This Data

Government Records

Official water records from Punjab.

1,500 Water Pumps

Real measurements from wells all over the city.

Satellite Pictures

Photos of the city taken from space.

Rain & Soil Studies

Data on where rain goes into the ground.

My Solution

→ **AI watches the water**

It checks water levels every day — automatically.

→ **Finds danger zones**

Shows exactly where water is running out.

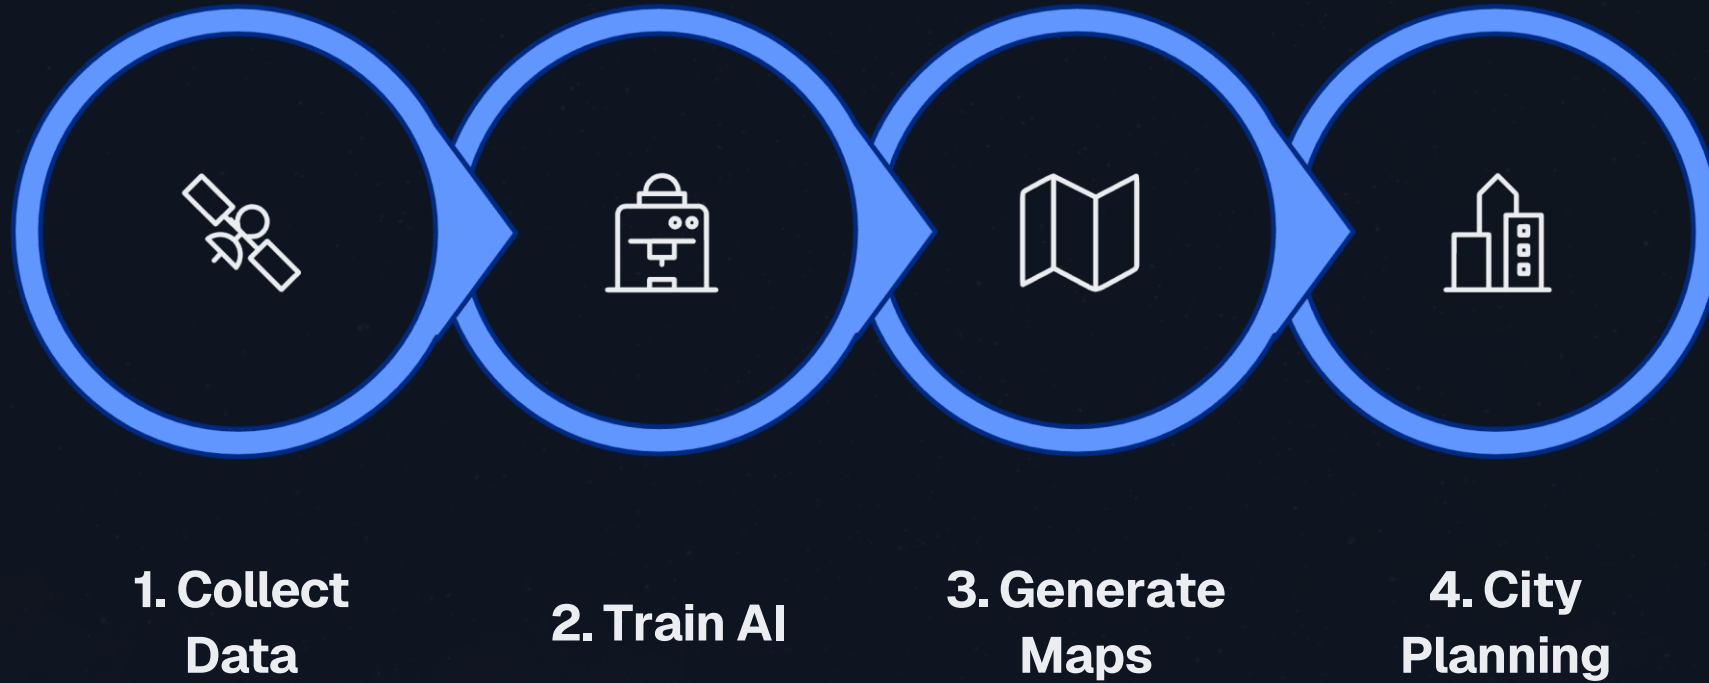

→ **Finds safe zones**

Spots the best places to catch rain water.

→ **Makes a city plan**

Helps leaders decide what to do next.

How It Works

Simple steps — powerful results for the whole city.

Why This Matters

10

Extra Years

More years of clean water for
Lahore.

36B

Litres Saved

Rain water we can catch and store.
